PERSONAL SUMMARY

Detail-oriented IT graduate and Full Stack Developer with experience in database design and data management, alongside a focus on Network and Information Security, technical support, and system troubleshooting. Familiar with MySQL, PostgreSQL, and Supabase, with hands-on experience through academic and personal projects involving database structuring and query optimization. Seeking an IT Support or Full Stack Development role to apply and further develop skills in IT infrastructure, data management, and cybersecurity.

WORK EXPERIENCE

Flag City Properties Inc.

February 2026 - April 2026

Web Developer Intern

- Provided IT support to employees by troubleshooting technical issues and assisting with system-related concerns.
- Performed software setup, system maintenance, and technical assistance across different departments.
- Assisted users in resolving technical issues to support smooth day-to-day operations.
- Developed and maintained the company website, contributing to front-end design and overall functionality.

PROJECTS

StegaVault: A Secured Multimedia Encryption and Steganography System

December 2025 - April 2026

Full Stack Developer

- Developed steganography techniques for secure data embedding
- Collaborated with the team to ensure system security, performance, and reliability
- Integrated AES-256-CBC (Cipher Block Chaining) encryption for data protection and confidentiality

Nail Architect: The Digital Glam Hub

April 2025 - May 2025

Full Stack Developer

- Developed both front-end and back-end components of the scheduling system
- Implemented user authentication, appointment booking, and service management
- Ensured that the database is easy to navigate

Brigade: An E-Commerce Clothing Store with PayMongo Integration

September 2024 - December 2024

Full Stack Developer

- Built a full-stack e-commerce website for Brigade clothing line
- Integrated PayMongo payment gateway for secure online payments
- Developed product, order, and inventory management features with responsive user experience

Nexer: A Netflix Inspired Streaming Platform

January 2024 - March 2024

Full Stack Developer

- Implemented user authentication, media management, and streaming support
- Optimized database queries and backend performance
- Ensured secure data handling and scalable system design
